**Interview Summary under 37 C.F.R. § 1.133(b)**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir or Madam:

In accordance with 37 C.F.R. § 1.133(b), entry of the following summary of the discussion between Examiner Marcela M. Cordero Garcia and attorney Andrew T. Karnakis is hereby requested.

On July 31, 2007, Andrew T. Karnakis (attorney for applicants) and Examiner Marcela M. Cordero Garcia discussed the outstanding written description rejection under 35 U.S.C. 112, first paragraph, for the above patent application. While the Examiner mentioned that all of the analytes discussed in the examples in the specification were drawn to peptides, applicants' attorney emphasized that such examples should not be considered limiting and that it is not the nature of the analyte which bestows inventiveness to the claimed subject matter. Accordingly, applicants' attorney argued

that the rejection is improper and that applicants should not be precluded from generically claiming subject matter related to various types of analyte molecules of interest that are labeled with the unique labeling reagents developed by applicants. While the Examiner offered possible ways to overcome the rejection, no agreement was reached.

Respectfully submitted  
on behalf of Applicants,

28 August 2007  
Date

Andrew T. Karnakis
